FACT FINDING

Join us for a conversation centered on your immediate educational needs for commercial projects.

FOCUS GROUP

Discuss and share your ideas on specific topics for specialized training, on-site labs and more.

EDUCATIONAL FOUNDATION

We want to train plumbers for the future in order to continue to protect the nation's health.

REACHING OUT BEYOND THE CLASSROOM

The Commercial Contractors Symposium aims to gather information directly from PHCC Commercial Contractor members on the types of advanced training that is needed for today's commercial and Public Works projects. Using that information, PHCC of California will expand on our current classroom offerings and develop specialized training, on-site labs, online webinars, membership forums and other services that are more technically advanced.
